

Satellite Event of the European Climate Pact

Format: 100% Remote | Asynchronous Video | Interactive Digital Posters

Introduction

AgriTech-One 2026 is structured around the **Strategic Dialogue on the Future of EU Agriculture initiative**. A globally accessible, diamond open access scientific event. Designed for PhD Students, Researchers, and practitioners — especially from conflict-affected and low-income settings where travel is not possible.

Wars in 2026—escalations in the Middle East, Sudan, Ukraine, and others—have created war driven food crises. To overcome these bottlenecks and to discuss how climate-adaptive crops can empower disrupted supply chains, we invite the Startups, the new researchers and practitioners, students and talented policymakers to discuss and share insights and prospective how low-tech biotech for smallholders in unstable regions might help. The conference is Digital Poster and Asynchronous Video based, to support also the conference attendance in affected regions.

Conference Objectives

- Highlight past achievements, recent advancements and future trends in AI based biotechnologies and their transformative potential for achieving efficient, inclusive, resilient and sustainable agrifood systems.
- Explore how biotechnologies, including low-tech tools and advanced innovations, such as genome editing and synthetic biology, small-scale producers, processors, traders and retailers of climate-adaptive crops can

empower disrupted supply chains, low-tech biotech for smallholders in unstable regions

- Share good practices in integrating digital technologies, to advance research, improve access, and scale biotechnological innovations.

Expected outcomes: The expected outcomes of the conference include fostering knowledge exchange on a wide range of biotechnological options for agrifood system transformation and increased awareness of the potential of biotechnologies with a Call for Action for achieving efficient, inclusive, resilient and sustainable agrifood systems.

The consolidated summaries of fully remote prerecorded plenaries and technical sessions are expected to inform the update of the EU statement call for evidence on biotechnology after the conference.

Target audience: The target audience for the conference includes representatives of Startups, PhD students, governments, international and inter-governmental organizations, academia and research institutions, civil society organizations, private sector (including philanthropic foundations) and producer organizations.

Format: The conference will consist of technical sessions on thematic topics, prerecorded plenaries focusing on Agrifood system sub-themes, Rapid Innovation Reports, "Tech-Brief" Session for startups and PhDs and the 5-Minute Pitch" Session (Rapid Research & Startup Demos). The individual sessions will be organized by adopting innovative and interactive formats.

- The "DOI Guarantee": Every accepted poster is assigned a unique DOI, ensuring young researchers get immediate, citable credit for their work.
- Submission Categories:
 - Posters: Digital A0 landscape format. Ideal for ongoing PhD research and startup tech-previews.
 - Video Presentations: 10–15 minute MP4 files. In English/French/Spanish. Best for young professors and innovators to showcase "AI in Action."

- The call emphasizes "Tech-to-Market" and "AI-Driven Sustainability" focused on the startup ecosystem.
- Asynchronous "Degrees of Freedom": Participants can engage with the video gallery at their own pace, which is a "warm welcome" for researchers across different time zones.
- Q&A forum with live annotations [asynchronous comments | voting | peer discussion | best poster]
- This is a Satellite event of European Climate Pact
- A distributed volunteer editorial team of 120 splendid researchers and practitioners from Universities and startups from Global South, will Review, revise, and deal with the technical blithers of the event. This splendid team of volunteer will add subtitles in the video for non-native speakers and will share with the participants the Digital Certificate of Participation with a block chain verification of recognition path.
- The conference presentations will be evaluated by 3 (three) independent Experts.
- Post Conference Phase: Publication of the Abstract Book and Conference Proceedings Book with ISBN and ISSN and the building of the VOD pipeline.
- The repository of the conference Proceedings is Zenodo
- Google Scholar Indexed
- The conference follows EU Metadata Policies and Standards
- 12 Scholarships for participants from Global South and LIC

• **Conference Deadlines:**

- **Abstract Submission: July 25, 2026.**
- **Notification: August 15, 2026.**
- **Conference Launch: September 25, 2026.**
- **Post Conference: October 20, 2026**

Researchers, Postdoc, PhD & PhD supervisors Session

- ✚ Facing the challenges of climate change: Adaptation in the crop and forestry sectors
- ✚ Improving productivity through enhanced resource use efficiency
- ✚ Social and economic impacts of agricultural biotechnologies for smallholders: Taking stock of the evidence and prioritizing future assessments

Policymakers, Deep-Tech & Start-Up Session

- ✚ Climate change: Adaptation in the livestock and fishery sectors
- ✚ Post production value addition and food safety (2 sub-sessions)
- ✚ Public policies, strategies and regulations on agricultural biotechnologies
- ✚ 'Tech-to-Market/ AI-Driven Sustainability'

Agenda may be subject to change
